Subject: Microsoft Settlement

Please revise the proposed Microsoft settlement to be harder on Microsoft. As it stands, this settlement will not succeed in bringing equity to the marketplace.

Microsoft does not deserve any special leniency. Please consider this email as a strong vote against Microsoft. They have flaunted the law long enough. Don't let them get away with their behavior any longer.

P.S. Microsoft has faked grassroots movements in the past in order to sway opinion to serve their cause, please seriously consider this possibility when reading the letters you receive.
